## PROJECTS

Performance analysis of AGSM adaptive unipolar MIMO-OFDM for visible light communication

- ▣ To switch between these modes by satisfying the target bit error rate based on received SNR
- ▣ To propose and analyse a MIMO AGSM mode for adaptive MIMO U-OFDM VLC system to achieve high spectral efficiency and low BER other then RC , SM and S MUX mode.

Mini Project

- ▣ Automatic Door bell with object detection with simulink by using opti system 14.0 version

## EXTRA CURRICULUM

Attending seminar on PCB Designing through Aptron in 2018

Participation certificate of Optical Fiber Sensor and their applications
